EDUCATION

Jaypee Institute of Information Technology — Noida, India

B.Tech, Electronics and Communication Engineering — ***CGPA: 8.6/10*** — *Aug 2023 – May 2027*

TECHNICAL SKILLS

Languages: C, C++, Python, PHP, JavaScript, TypeScript, SQL

Core CS: Data Structures & Algorithms, Operating Systems, Database Management Systems, Object-Oriented Programming, Computer Networks, System Design

AI/ML: Machine Learning, NLP, Deep Learning, LangChain, Hugging Face, RAG, PyTorch, TensorFlow

Frontend/Mobile: React.js, Next.js, Flutter, Streamlit, Tailwind CSS, HTML5, CSS3

Backend/APIs: Node.js, Express.js, Flask, FastAPI, RESTful APIs, WebSocket, JWT Authentication

Databases, Cloud & Tools: MongoDB, PostgreSQL, MySQL, AWS, Azure, Docker, Git, Linux, CI/CD, Postman

EXPERIENCE

DigiFlute Media Lab — Remote

Backend Developer Intern — *May 2026 – Jul 2026*

- Engineered **30+ RESTful API endpoints** in **PHP** and **MongoDB Atlas** for Packspec, contributing to the **end-to-end product development lifecycle** within a cross-functional **Agile** team of **8** engineers.
- Structured **scalable, multi-tenant systems** by implementing **JWT authentication** and RBAC across **5 role tiers**, using atomic transactions to eliminate cross-tenant data leaks and strengthen platform **security**.
- Automated **15+ business workflows** via a custom snapshot versioning engine, cutting manual reconciliation effort by **65%**; validated across **200+ Postman test cases** to ensure reliability and **performance**.

PROJECTS

Chessify AI — Intelligent Chess Platform — ***Next.js, Node.js, Socket.IO, Flask*** — GitHub

- Architected a **scalable real-time multiplayer chess platform** using **Node.js & Socket.IO** with live board sync, server-side validation, and spectator mode for **100+ concurrent users**.
- Integrated a **Flask AI backend** with the **Stockfish engine (ELO 1800)**, a Polyglot opening book, and a custom **Minimax + alpha-beta pruning** engine (depth 3) for move generation.

StudySync — Smart Timetable & Calendar App — ***Flutter, MongoDB, Express*** — GitHub

- Designed a **robust cross-platform timetable app** with **offline-first architecture** via local caching and auto-sync, restoring full sync within **1.5s** of reconnect for **2,000+ users** during network outages.
- Architected **10+ REST API endpoints (Express + MongoDB)** with an authenticated admin panel for centralized management, delivering real-time updates in under **120ms**.

SahYatri — Public Transport Analytics — ***IoT, YOLOv5, Node.js, PostgreSQL*** — GitHub

- Deployed a **fine-tuned YOLOv5n model** on **Raspberry Pi 4** at **15 FPS** with adaptive thresholding, achieving **90%+ detection accuracy** for real-time passenger counting.
- Established a **Node.js & PostgreSQL** backend processing **50,000+ sensor events/day**, streaming live time-series data every **3s** to a **React.js** dashboard and **Flutter** commuter app.

ACHIEVEMENTS & CERTIFICATIONS

- **1st Place, BitBox 5.0 Hackathon (Google Developer Groups)** — Won for **SahYatri**, an IoT-based public transit analytics system built with Computer Vision and full-stack technologies. Certificate
- **Finalist, Innovate 3.0 Hackathon** (Jan 2026) — Selected among top teams for **Drive-Sure**, an AI and IoT-based vehicle telematics and driver safety device. Certificate
- **LeetCode Knight** (Peak Rating: **2036**) — Solved **1000+ Data Structures and Algorithms problems** across LeetCode, Codeforces, and GeeksForGeeks with a **250-days consecutive algorithmic coding streak**.
- **Independent ML Engineering:** Built and deployed a RAG-based PDF Query Engine on Hugging Face Spaces using LangChain and CrewAI multi-agent frameworks to automate document workflows.
- Completed **Complete Data Science, Machine Learning, Deep Learning & NLP Bootcamp** (Udemy, Mar 2026) and **Generative AI with LangChain & Hugging Face** (Udemy, Apr 2026). Cert 1 Cert 2
- Awarded **Letter of Appreciation** from JIIT for outstanding academic performance in core engineering subjects.
