EDUCATION

Jaypee Institute of Information Technology

B.Tech, Electronics and Communication Engineering — CGPA: 8.6/10

Noida, India

Aug 2023 – May 2027

TECHNICAL SKILLS

Languages: C, C++, Python, PHP, JavaScript, TypeScript, SQL

Core CS: Data Structures & Algorithms, Operating Systems, Database Management Systems, Object-Oriented Programming, Computer Networks, System Design

AI/ML: Machine Learning, NLP, Deep Learning, LangChain, Hugging Face, RAG, PyTorch, TensorFlow

Frontend/Mobile: React.js, Next.js, Flutter, Streamlit, Tailwind CSS, HTML5, CSS3

Backend/APIs: Node.js, Express.js, Flask, FastAPI, RESTful APIs, WebSocket, JWT Authentication

Databases, Cloud & Tools: MongoDB, PostgreSQL, MySQL, AWS, Azure, Docker, Git, Linux, CI/CD, Postman

EXPERIENCE

DigiFlute Media Lab

Backend Developer Intern

Remote

May 2026 – Jul 2026

- Engineered **20+ RESTful API endpoints** in **PHP** and **MongoDB** for Packspec, a product/package specification management platform, using a modular, middleware-based route architecture.
- Implemented **JWT authentication** and role-based access control (RBAC) with a **multi-tenant, company-scoped** data model, including invite-based onboarding, workspace provisioning, and plan-based quota enforcement.
- Built CRUD APIs for products, components, and specifications with workflow-state transitions, revision versioning, and cascading soft-deletes; validated via **Postman/PHPUnit** test suites.

PROJECTS

Chessify AI — Intelligent Chess Platform — *Next.js, Node.js, Socket.IO, Flask*

GitHub

- Developed a **real-time multiplayer chess platform** using **Node.js & Socket.IO** with live board sync, server-side move validation, and spectator mode supporting **100+ concurrent users**.
- Integrated a **Flask AI backend** with the **Stockfish engine (ELO 1800)**, a Polyglot opening book, and a custom **Minimax + alpha-beta pruning** engine (depth 3) for move generation.

StudySync — Smart Timetable & Calendar App — *Flutter, MongoDB, Express*

GitHub

- Designed a **cross-platform timetable app** with **offline-first architecture** via local caching and auto-sync, ensuring **100% accessibility** during network outages.
- Architected **REST APIs (Express + MongoDB)** with an authenticated admin panel for centralized management and **sub-second** real-time updates.

SahYatri — Public Transport Analytics — *IoT, YOLOv5, Node.js, PostgreSQL*

GitHub

- Deployed a **fine-tuned YOLOv5n model** on **Raspberry Pi 4** at **15 FPS** with adaptive thresholding, achieving **90%+ detection accuracy** for real-time passenger counting.
- Established a **Node.js & PostgreSQL** backend with time-series storage and a RESTful inference pipeline, streaming live data to a **React.js** dashboard and **Flutter** commuter app.

ACHIEVEMENTS & CERTIFICATIONS

- 1st Place, BitBox 5.0 Hackathon (Google Developer Groups)** — Won for **SahYatri**, an IoT-based public transit analytics system built with Computer Vision and full-stack technologies. [Certificate](#)
- Finalist, Innovate 3.0 Hackathon** (Jan 2026) — Selected among top teams for **Drive-Sure**, an AI and IoT-based vehicle telematics and driver safety device. [Certificate](#)
- LeetCode Knight** (Peak Rating: **2094**) — Solved **1000+ Data Structures and Algorithms problems** across LeetCode, Codeforces, and GeeksForGeeks with a **250-days consecutive algorithmic coding streak**.
- Completed **Complete Data Science, Machine Learning, Deep Learning & NLP Bootcamp** (Udemy, Mar 2026) and **Generative AI with LangChain & Hugging Face** (Udemy, Apr 2026). [Cert 1](#) [Cert 2](#)
- Awarded **Letter of Appreciation** from **JIIT** for outstanding academic performance in core engineering subjects.
